

Xpert RTD

IRTD Display Interface Unit

- + *XpertRTD® is a stand alone display and interface between smart probes and Lives International Systems*
- + *User selectable: engineering units display in °C, F, K and Ohm*
- + *Automatic address detection of the smart probes*
- + *RJ connector to Smart Probe / connectable to Validator*
- + *USB / radio frequency signal transmission to XpertLog® systems*

Stand alone display and interface between smart probes and Lives International Systems:

- user selectable engineering units display: °C, F, K and Ohm
- calculates and displays the minimum and maximum temperature values
- USB connection to XpertLog® systems
- radio frequency signal transmission to XpertLog® systems
- radio frequency transmission: 2.4 GHz
- wireless range: 121m (400 feet) line of sight
- automatic address detection of the smart probes
- weight 300 g (10.58 oz)
- RJ14 connection to Smart Probe / connectable to Validator
- power supply 12 V DC
